

BRAHMANA PURBA

Information Technology Student

brahmanapurba09@gmail.com | +62 822 1398 1324 | Humbanghasunduta, North Sumatra

PROFESSIONAL SUMMARY

Information Technology diploma student at Institut Teknologi Del with interests in backend development, web and mobile application development, artificial intelligence, machine learning, and database systems. Has academic project and research assistant experience involving requirements analysis and software implementation. Demonstrates leadership, communication, teamwork, adaptability, and time-management skills. Seeking an IT internship opportunity to develop practical skills and gain professional experience in the technology industry.

RELEVANT EXPERIENCE

Research Assistant – Requirements Analysis

Local Content Educational Game Project, Institut Teknologi Del
2025

- Collected and analyzed requirements data to identify target users' needs for a local-content educational game application.
- Contributed to defining application requirements and developing an initial prototype to support the next stage of development.

Research Assistant – Software Implementation

Local Content Educational Game Project, Institut Teknologi Del
2025

- Contributed to front-end development using Unity for the game application and React for its web interface, as well as back-end development using Go.
- Supported the implementation of TOBA as the project progressed from pre-production into production, with limited involvement in testing and debugging.

Vice Chairperson – HIMATIF

Information Technology Student Association, Institut Teknologi Del
2025–2026

- Coordinated divisions and members, monitored task progress, and ensured organizational responsibilities were carried out effectively.
- Communicated with the Head of the Information Technology Study Program to coordinate and support the smooth execution of student activities.
- Assumed organizational leadership and coordination responsibilities in the chairperson's absence, including handling operational decisions and supporting the implementation of most work programs.
